

You are invited to Southline Transmission Project's open houses

Missed our November meetings? Join us for a new round of December open houses!

Southline Transmission, L.L.C. is requesting an amendment to its 2017 Certificate of Environmental Compatibility (CEC no. 173) to expand Southline's construction approval to include the upgrade of approximately 60 miles of an existing Western Area Power Administration transmission line.

Southline invites you to attend an in-person open house meeting to learn more about Southline, ask questions, and provide input while meeting with Southline representatives.
